Reset

Press to reboot; long hold for factory reset.

Get started with the Pharos Expert Software

Free to download: pharoscontrols.com/expert

Connect your Expert Control to the same network as your computer and follow the new project helper in Expert software to get your device up to date, setup security and start creating your project file.

SPACES

Manage your fixtures intuitively – from one canvas to nested rooms and zoned areas, your fixtures are naturally grouped where they are located.

SCENES

Fulfil your lighting design – ranging from just colour and intensity, through to creative effects and sequences that can be subtle, ambient, or dramatic!

STATES

An innovative new approach to managing how lighting events are activated, with choices determined by logical combinations of tagged Scenes and behaviours.
